

CREAMERY WILL OPEN EARLY IN OCTOBER

Alterations Now Being Made On Shoop Building East of the Hunter Hotel

The first week in October will see a creamery business established in Basasso, according to what can be learned of the plans of W. A. Brodie, who is now operating the Duchess Creamery.

Mr. Brodie has procured the building known as the Shoop building, just east of the Hunter Hotel, and next to the Lethbridge Brewery of 500 and warehouse, and expects to move the machinery and equipment from Duchess early next month. Harry Holmes, Basasso builder and contractor, has been working on the building this week, and has torn up the wooden floor in preparation for the laying of a concrete floor. Gravel is now being hauled for the concrete floor. Sewer and water connections are now being made, and the floor will be put down as soon as these are ready.

At the rear of the building an addition will be built measuring 18x25 which will be used for a boiler house, engine room, and coal shed. Operating his business in Basasso, Mr. Brodie, the creamery manager, will draw patronage from a much larger territory than he now has at Duchess. He expects to do a good business here.

Countess News

COUNTRESS, Sept. 1st.—Mildred Ferguson will go to high school in Guss this winter.

B. Wilkins who has been visiting his sister, Mrs. Strider, left the first of the week for Lethbridge, Alta., where he has a position for the week-end. Mr. and Mrs. A. M. Anderson were dinner guests at the Dingley home on Sunday.

A number of the farmers are cutting grain this week in the district. Mr. Strider and B. Wilkins with Mr. and Mrs. Kehr and Miss Kehr went to Hanna for the week-end. Mrs. H. Cowen, Mrs. A. M. Anderson, Mrs. W. Dingley and Mrs. Jones were afternoon visitors with Mrs. M. Canale Saturday.

Mr. and Mrs. Cowen and children went for a motor trip to Baymont and where they visited Chas. Bell and Sam Henderson.

Fred Robinson is at Lethbridge with his thrasher, churning, etc.

Miss Bingham arrived Wednesday evening from Edmonton. Miss Bingham will teach at the Countess school again this year, school reopened on Thursday.

Misses, Banks, and Mildred Ferguson, Corryl Gamble, and Bob Loe, drove to the dam on Sunday for a picnic.

School opened Monday at Clameau school with Miss Smith as teacher.

Mrs. Wilkins, Mrs. Strider and Mrs. Jones were visitors at the Gamble home on Sunday.

Miss Violet Bramley, of Basasso, will teach this year at Brax Brae school.

Mrs. Kehr has as her guests on Thursday in honor of Miss Kehr, of Calgary, Madame Gamble, Anderson, Dingley, and Bique.

Miss Kate left Tuesday for Calgary where she will teach in the city school.

Mrs. A. M. Anderson is spending a few days in Calgary.

The Brooks farm will be held next week, Monday and Tuesday, Sept. 5th and 6th.

Dance In Rink On Labor Day

A big Labor Day dance is being held in the Curling Rink Hall on Monday evening, Sept. 5th, under the auspices of the Anglican Vestry. Preparations have been made to make the dance a most enjoyable and interesting affair. The Hiss-Hon-Simpson orchestra will play.

Gem News

GEM, Aug. 31.—Mrs. Leslie Douglas and Mrs. Douglas of South Africa were recent callers at the home of Mrs. K. Small, enjoying a social hour. The Misses L. Pollock, Edna Robinson and M. Chamberlain returned home on Sunday from Watrous Hills where they have been enjoying a holiday with Mrs. C. Jones.

Mrs. Foley returned to Calgary on Wednesday. She has been visiting here during the past week. Mr. J. Johnston of Basasso and a few friends with P. Williamson enjoyed good fishing at the Hutton River last week.

On Sunday last the Gem boys accompanied by a large number of Gentles, journeyed to Rosemary to play a friendly game of football. The Gem boys returned to the colony victors. Mrs. J. Sparks is a patient in the Basasso Hospital.

Mr. and Mrs. C. Jones and Eugene of Watrous Hills, spent a pleasant Sunday in the colony visiting many friends. They were dinner guests of Mrs. C. Fortney who has a patient in the Basasso Hospital since Monday last.

Mrs. J. Horne recently spent a pleasant Thursday with Mrs. E. Small.

Miss E. Seifridge will leave the colony in the near future for Calgary where she intends to continue her musical education at the Sacred Heart Convent.

Cutting and harvesting is becoming general in the district, where the crops are all in an excellent condition and are ripening fast. Dungen fields are expected everywhere.

Automobile salesmen were very plentiful in the colony last week.

Mrs. J. Stepp is the guest of Mrs. T. L. Maguire since last Sunday. The Gem school re-opens on Tuesday next, Sept. 5th, with a full staff of teachers. Miss Waldron filling the position of Principal.

Violet Pollock expects Mount Royal College on Monday next, where he will continue his studies in future.

Mrs. Schneider had the pleasure of entertaining Mrs. Foley and children and Mrs. Jahraus to dinner on Sunday last.

Henricka returned to Hunsar on Sunday last, returning same evening with his mother Mrs. J. Stepp, who is spending a few days visiting old friends in the colony.

1927 WHEAT

The first load of 1927 wheat was received by W. H. Wray at the Ogilvie elevator in "The Kid Brother." His grain came from the farm of E. P. Mahler, who testing it out with a combine. Mr. Mahler cut only a little on Saturdays, and started in earnest on Tuesday the 30th.

CHICKEN ARE POPULAR
 A number of new Chrysler cars have been sold in the district during the past couple of weeks. Currie & Milroy, Ltd., Chrysler dealers, announce the following sales: Miss K. M. Patrick, a "52" coupe; E. O. Teigland, a "52" coupe; Mrs. Arrison, a "48" landau sedan; Dag Hefthower, a "52" sedan; L. J. Jensen, of Maplebank, a "52" sedan; Geo. Walsh, a "52" sedan.

Joseph T. Shaw Visits Bassano

How Valley M. B. A. Makes Short Trip Through Country

Joseph T. Shaw, member of the provincial house for How Valley, spent last Friday and Saturday in Basasso, during a short tour he was making through his constituency.

Mr. Shaw was pleased with crop conditions around Basasso, and said the wheat here was as good as any he had seen in the province. He was very optimistic of the future of Alberta and predicted an era of prosperity throughout the whole of the province.

PUBLIC HOLIDAY ON MONDAY

Stores and Banks Will Observe Labor Day, Monday, Sept. 5th

Next Monday, September 5th, is Labor Day, and a public holiday. Stores and banks will be closed. The post office will open for the first time in the morning, from eight o'clock till nine.

A number of townships will spend the holiday out of town, some going to the Brooks fair which will be held Monday and Tuesday, Sept. 5th and 6th.

SCOUTS ENJOY FINE OUTING

A group of about ten scouts of the Basasso troop enjoyed a five day camping trip at the C. F. R. horse pasture, on the Bow River south of town, last week.

The boys under the leadership of troop leader Ralph Johnson, rode out to their horses, pitched camp close to the water, and there had a real time fishing, boating and swimming.

The scouts had good luck fishing, and caught some specimens of the (finny tribe), which were baked on the campfire and hurriedly disposed of by the boys whose appetites were sharpened by the camp life and outdoor exercise.

The scouts had good luck fishing, and caught some specimens of the (finny tribe), which were baked on the campfire and hurriedly disposed of by the boys whose appetites were sharpened by the camp life and outdoor exercise.

Harold Lloyd Gives Laughs And Thrills

Harold's Newest, "The Kid Brother" Combines Comedy and Pathos

Much as he dislikes being classified as a "thrill comedian," any more than he aspires to be identified with any type of character, of picture, it is a fact nevertheless that Harold Lloyd has set the pace, not alone for comedians, but for all picture producers.

In the art of chaffing the pipe and jangling the nerves. He again demonstrates his mastery with the finishing sequence in "The Kid Brother," his newest contribution to the realm of mirth, which becomes the logical successor to "For Heaven's Sake."

"The Kid Brother" will be shown in the Gem Theatre Friday and Saturday this week, Sept. 5 and 6.

"The Kid Brother" is far from being a thrill comedy. It is a mixture of comedy, pathos, and romance, and relates one of the most entertaining stories Lloyd has ever given in the screen. Laid in a small mountain town it gives an entirely new twist to the type of production, and presents the comedian in a characteristically as lovable and sympathetic as "Greta's Boy."

The story tells the tale of the youngest son of a family of strong men who control a tiny mountain town. A medicine show operator and Harold, wearing the sheriff's badge, gives them a lesson. Father hears of this, and there's a war. Harold has a terrible time righting things when the show tent catches fire and a large sum of money is stolen. But it all turns out for the best as in a thrilling fight about an abandoned ship, Harold proves himself a hero and worthy of being called something other than "Kid Brother."

A special holiday entertainment will be shown on Labor Day, Monday evening, Sept. 5th, "Scarlet West."

The top crop being threshed is showing a good yield, running about 20 bushels to the acre, and one crop is reported to have gone 25 bushels.

GOLDEN GRAIN GOES DOWN BEFORE BINDERS AND COMBINE MACHINES

Binders Going on Neatly Every Farm in the District—Some Wheat Being Cut by Combine—Yield Will be High and of Good Grade

All day long the steady hum of binders is to be heard in the wheat fields around Basasso. From early morning till sundown the harvesting machines make their rounds of the wheat fields, each round cutting deeper and deeper into the "golden grain," and leaving the field behind marked with staked rows of grain that will later be set up into shocks. Occasionally the farmer pulls up his binder and sides the binder. He cleans away the seed and, taking the oil can be carefully gone over the machine, squirting oil on each bearing that needs it, and perhaps setting up another hitch in the combine that has been slipping a little.

As he climbs back to the seat and picks up the line he goes out into the field and makes the combine. Perhaps his eyes inwardly, but at any rate, he smiles, for he is harvesting a big crop, a bumper crop, the best he has ever seen.

Here is the result of his whole year's work; and it is good to look upon, for it is a beautiful harvest, and he is being well repaid for his labor.

Over in the field to the right is a neighbor who is also cutting a heavy crop, and in the field to the left another neighbor is in the middle of the big harvest. All around him farmers are busy with the harvest, and in every case the grain is heavy, and a bit wet is usually satisfaction.

There are no poor crops. Whether the grain was sown on summer fallow, spring plowing, or stubble in, the wheat has done a wonderful growth, and will yield heavily. Thirty bushels to the acre is a conservative estimate, and most fields are expected to yield from 35 to 40 bushels to the acre.

Harvesting is now in the second week of operation, and going full blast. A fall of rain on Monday caused a delay of one day in the work, but on Tuesday cutting was resumed.

Use Combine
 Combine harvesters are being used for the second season in the Basasso district. E. P. Mahler is cutting his grain with a combine which he used for the first time last season, and Mrs. Arrison and D. Hefthower will also harvest their wheat with a combine.

E. P. Mahler started cutting with the combine Tuesday afternoon in a field of 40 acres field sown to registered Marquis wheat. The combine is pulled by a tractor, and the outfit is operated by two men, one on the tractor and one on the combine.

The machine is a fine piece of work, and cuts about thirty acres a day.

Bearcats Will Play Brooks Labor Day
 Local Ball Team Play at Brooks on Next Monday Afternoon

The Basasso Bearcats will play the Brooks team next Monday afternoon, Sept. 5th. The baseball game is part of the program to be put on in Brooks during the two day fair, Monday and Tuesday, Sept. 5th and 6th. On the first day of the fair Brooks will play Hunsar, and on the second day Brooks will play Hunsar.

Rosemary News
 ROSEMARY, Sept. 1.—The rain on Monday delayed harvest for a short time, but it is again in full swing.

Being very little danger of hail now there are promises of the biggest crop this district has had for a number of years, and the outlook is good.

On opening a crate of bananas from Louisiana, Louis found a large tarantula spider on top of the crate. But it was a little too late when he found it, for it had been eating the bananas for some time.

The basket ball game played at Rosemary last Sunday was another fine one, and the home team, the score ending 20.

Mr. and Mrs. Conn and family, of Medicine Hat, were in Rosemary on Sunday.

Mr. Gildred and Mrs. Copeland, our local school teachers for this year, arrived on Saturday and commenced teaching on Monday, Aug. 29th.

Hunsar News

HUNSBAR, Sept. 1.—There will be a special girls' service in the Community Hall on Sunday evening, Sept. 4th. The service will be conducted by the girls and Mrs. E. J. Bell will read.

Mr. Barton's sermon will be on "The Gift of Our Finest." The girls' group will render special songs.

Miss Vivian Clifton who has been employed in the Montreal Bank at Hunsar, has returned to her home in Hunsar for a short vacation.

Miss Zola Bell has returned to Hunsar after spending her holidays in Ontario. Miss Bell will this week resume her duties as teacher in the Atlas school.

Miss Mary Tierney, of Calgary, is visiting with her parents.

Mrs. and Mrs. A. A. Clifton were in Calgary last week.

Miss Beattie Pault left for Calgary on Monday where she will attend the South Calgary high school. She was accompanied by her mother, Mrs. Myrtle, the latter spending a few days in the city.

Mr. and Mrs. King motored to Calgary this week.

Mr. and Mrs. Hoover, of Camrose, spent a few days with the former's sister, Mrs. Frank Farley, last week.

Miss Edna Kuchel was a Calgary visitor this week.

Mr. and Mrs. Fred Buck have returned to Hunsar after a motor trip to Washington.

Mr. and Mrs. L. Clark, Mrs. Lita Fryberger, and Miss Pearl Leitch, motored to Banff on Tuesday.

Mr. and Mrs. William Henselwood, and Mrs. D. H. Clifton, are visiting in Hunsar. Mrs. Henselwood's parents, Mr. and Mrs. A. D. Williams.

A very large and jolly crowd attended the "hardline" dance at the Fair ball school on Saturday night. Everyone was dressed to suit the occasion, and the orchestra was at its best. There will be another dance at the Duck Lake buildings this Saturday.

Wm. Tracey and family motored to Banff last week for a short holiday.

Miss Delia Porzyr is leaving this week for Rockford, Washington, where she has accepted a position as teacher in household economy in the Intermediate Grade.—Miss V. King Junior Grades.—Miss H. Nicol, Primary.—Mrs. O. Hartley.

NEW MACHINERY FOR AUXILIARY LIGHT PLANT

New Building Now Being Erected to Replace One Burned Down

Work is progressing rapidly on the new building that will house the new machinery for the auxiliary electric light plant south of town. The walls of the building are now going up, and no time is being lost in pushing the work as rapidly as possible. Harry Holmes is erecting the building.

The new machinery has arrived, and the engine was placed on the engine house on Wednesday. This week Jack Allen, local superintendent of the United Electric and Engineering Co., expects to have the auxiliary plant in operation in about ten days if the work goes along smoothly.

In the meantime the hydro plant at the dam, carrying the whole load, and although the current is not so strong as it was before the auxiliary plant was put out of commission, no serious trouble or inconvenience is being experienced.

Brother Of Sergt. Wight In Charge New Northern Post

Sergt. J. E. F. Wight, brother of Sergt. Robt. S. Wight, local A. P. P., has been placed in charge of a new police post, established in the north.

Sergt. J. E. F. Wight has spent many years in the service of the Royal Canadian Mounted Police in northern latitudes, and knows the north country like a native. The despatch telling of the new police post was as follows:

Aid the frozen wastes of the northland, Sergeant J. E. F. Wight and Constable P. Dersch, of the Royal Canadian Mounted Police, are in charge of a new post established in the Canadian Arctic archipelago, according to a wireless message from the government patrol ship, Dootlie.

The new post has been erected at Lake Harbor, on the south coast of Baffin Island.

The Dootlie is now on the home-ward voyage.

Hidden Treasure of Bon Echo

Control Photo-Shoot at Bon Echo. The highest cliff of the Bon Echo is the scene of a photo-shoot. The photo-shoot is being held by the Bon Echo Club. The photo-shoot is being held by the Bon Echo Club.

While the very atmosphere of Bon Echo, one of the most popular summer resorts in the Highlands of Ontario, is a place of no less interest and is nothing to talk of the desperation with which men sought to wrest a secret hoard of silver from the blue waters of the upper and lower Mainau.

There is a tale of legend, and a fortune of silver but the story that is most generally accepted is that it was buried brought out by the Indians and used in exchange for blankets, axes, whistles and firearms and that they had stored away silver in a cave in the cliff face.

One John Myers, who kept a store at Myererville, often engaged goods for the Indians' needs, but he never discovered where the cache actually was.

His son, however, was brought up with the Indians and used in exchange for blankets, axes, whistles and firearms and that they had stored away silver in a cave in the cliff face.

What the three of them went up the Mainau River from Myererville to Loom Lake and across country to Bon Echo. Somewhere on top of the cliff they came upon two flat stones. By force of mind they pushed them aside and discovered an opening about twelve inches in diameter.

A COSTLY EXPERIMENT

Important developments are now taking place in the building of the Hudson Bay Railway and the terminal of that line. The British engineer, Frederick Palmer in charge of the work, has chosen Port Churchill as the most suitable terminus to Port Nelson, and this has furnished a starting point for another avalanche of criticism and comment on the feasibility of the Hudson Bay route and the choice of the most suitable terminal.

Already several million dollars have been spent at Port Nelson, but the British engineer finds that Port Churchill possesses greater natural advantages than Port Nelson, and the latter is abandoned. He finds that information on the ice conditions at both ports is very vague. This seems to be the character of the "route" project—vague and uncertain. The success of the Hudson Bay railway as an outlet for western grain depends upon whether or not it can be made to compete with the railway terminal, through Hudson's Bay and the Hudson Strait to the Atlantic Ocean.

The passage is available at certain periods of the year, but it is to be made by a fleet of freighters making regular trips between the railway terminal and Liverpool, there is a vast sea of uncertainty. The Hudson Bay route is an experiment, a huge and costly experiment. If it is successful it will save millions of dollars have been squandered, millions that might have been used for other and more immediate needs.

THE TOWN IRRIGATION SCHEME

The building of the town irrigation system has brought almost to completion. They yet remains a little work on the culverts for the lateral ditches, and the irrigation committee has to finish this work next spring. The pumping machinery has been installed, and last week was tested out and found to be very satisfactory. Water was pumped into the main ditch at far as the west side of the town, and the ditch was found to carry the water well.

The satisfactory results of the test are gratifying to the irrigation committee and to the Board of Trade, who favored the project and who are directly responsible for the system being built.

Fortunately there has been an abundance of rainfall this season, and it has not been necessary to irrigate. For this reason the work of building the system was not rushed as rapidly as would have been the case had the season been a dry one. Next spring the irrigation system will be put in working shape at an early date so that water will be available as soon as needed. It is expected that irrigation will be of great benefit to the town by providing water for trees, shrubbery, and gardens, and also for the swimming pool.

AUTUMN

The wind is softly sighing through the trees
 And soon the green will turn to golden brown.
 Ah! soon the cooling gentle summer breeze
 And Autumn down again her wondrous gown.
 Just a brief space ago we watched the budding leaves
 Break forth in all their beauty for awhile
 To gladden heart and eye with joyful ease
 And fill our souls from nature's bounteous store.
 We lift our eyes to fields of golden grain,
 Another sign that Autumn time is here;
 And out beyond, to pierce the misty veil
 'Tis earth and sky, to feel his presence near.
 Oh! autumn time! When leaves are gently falling
 You come to us with treasures wealth untold!
 And in the falling leaf we see another harvest
 Planned by our Maker, life to us unfolds.
 —P. N. MacGregor

Birth of a Splinter

"What steps would you take if you saw a dangerous lion on the campus?"
 "Long one."

SHE WALKS IN BEAUTY

She walks in beauty, like the night
 Of clouded climes and starry skies,
 And all that's best of dark and bright
 Meet in her aspect and her eyes:
 Her mien's the line that teaches light,
 Which heaven to earth day doth detain,
 One shade the more, one ray the less,
 Had half impair'd the nakedness of grace.

Which waters in every ravine course
 To silt the fountain o'er her face,
 Where thoughts serenely sweet express
 How pure the bliss that we do share
 In the untraced but sure soul that shows
 How pure the bliss that we do share

Flow pure, how dear their dwelling-place,
 And on that cheek and o'er that brow
 So soft, so calm, so eloquent,
 The smiles that win, the tints that glow

But tell of days in goodness spent,
 A mind at peace with all below,
 A heart whose love is innocent
 —Lord Byron

Members of the newly-appointed Saint John Board of Harbor Commissioners visited in Montreal recently to confer with officials of the Canadian Pacific regarding needed changes and improvements in the harbor facilities of Saint John. Several suggestions advanced by the railway company will be acted upon before the winter traffic begins, according to the Hon. W. E. Foster, president of the Commission.

Interest taken by American Railway officials in the latest achievements in the way of Canadian locomotive construction is emphasized by the fact that the Canadian Pacific Railway Company has been invited to send their latest and most powerful passenger engine to be placed on exhibit at the Centenary Exhibition and Pageant being held at the Maritime Railway Station at Baltimore, September 24 to October 8. The C.P.R.'s "2000" engine, their latest and finest passenger type, will be sent to Baltimore.

The first ticket issued from the new Union Station at Toronto over Canadian Pacific lines was enclosed in a special leather folder, upon which appeared the name of His Royal Highness, the Prince of Wales, and three tickets following were issued to H.R.H. Prince George, Premier Stanley Baldwin and Mrs. Baldwin. The new union station was formally opened by the Prince of Wales, the Royal train being the first to steam into the new depot.

A cable received at Ottawa by the Department of Trade and Commerce from Harrison Watson, Trade Commissioner for Canada in London, indicates that Great Britain will offer an attractive market for Dominion's exportable surplus of timber and clover during the present year. The cable reads as follows: "English hay crop turning out so badly that imported hay will be required. Prospects are that there will be a fair demand for Canadian timbers and clover this year."

THE MAN-MONKEY

In Alexander a man or a monkey? The question has been puzzling doctors and scientists since he was discovered in Abyssinia, a village in Abyssinia. Alexander is the son of two peasants, who have five other perfectly normal children, but when he was a child he grew a monkey-like countenance. He was born with a large head, did not grow up quickly, or sit, but grunted, climbed trees, and progressed by leaping on all fours. His parents taught him out of a house and chained him to a cow stall, where for nineteen years he has been treated like an animal and fed on household leavings.

One day Alexander escaped from his stall and caused a panic among the peasants who took him for a kordak. Eventually a wealthy showman offered Alexander's father a large sum of money for him to exhibit this extraordinary freak of nature. At Budapest he was taken to a medical clinic, and now is housed in a large cage awaiting the decision of the doctors whether he is a man or a monkey.

His family history does not afford any explanation of the remarkable relapse to prehistoric man.

FUR INDUSTRY IMPORTANT ONE IN ALBERTA

CALGARY—According to a recent report of the game guardians branch of the department of agriculture, Alberta's fur sales in 1928 amounted to \$1,212,775, or an increase of \$90,090 over the previous year. The province now ranks third in this regard. Ontario showed \$2,491,511, and Quebec \$2,350,808. The other provinces have productions as follows: Manitoba \$1,449,904; Saskatchewan \$1,290,054; British Columbia \$1,237,000; the Maritimes \$588,289; Yukon \$230,501; Northwest Territories \$1,026,675. The Dominion total of \$10,400,000 odd showed, no change from the year before.

HERE AND THERE

The west will require 50,000 men from Eastern Canada to assist in gathering the grain crop this year. In all about 67,000 men will be required to complete the work. Arrangements have been made by both railways to handle the harvesters.

T. O. F. Harver, manager of the Canada Outdoor Life Association, has stated that this organization has placed 400 Old Country families in the Prairie Provinces this year and that 800 other families will arrive before the end of the year.

The fourth annual ride of the Trail Riders of the Canadian Rockies, an organization with a membership of 1,000, will start from Banff, Alberta, and will visit the most prominent artists, writers and society leaders in all parts of Canada, U.S. and Europe, left recently from Banff over a new trail for Mount Assiniboine.

A shipment of 1,400 horses purchased in the Prairie Provinces for the Russian Government moved to Quebec over Canadian Pacific lines recently. In addition to the 57 cars already moved to the east a special train of 17 cars passed through this city en route to the Atlantic coast. The horses in the latter shipment were all purchased at Alberta's polo.

Driven by over-occupation in eating bark of trees and seaweed from the ocean, the wild goats of Gueloupe Island are changing their habits and, in some respects, their form. They are learning to climb leaning trees in search of foliage.

According to recent game regulations in the Province of Alberta, prairie chickens, grouse, partridge, quail and some species of their kind. They are learning to climb leaning trees in search of foliage.

It has been announced by Premier Ferguson, of Ontario, that the Government proposes to foster the creation of an industrial research institution with an endowment of \$5,000,000 for the purpose of solving scientific problems of production and processes for Canadian industries.

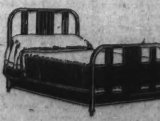

Simmons Bedding

Value mattress, guaranteed all layer-built white cotton mattress, covered in a durable, attractive ticking roll edge \$9.75

- Peerless mattress, good serviceable all white cotton layer built mattress 11.75
- Olympic mattress, a very high grade mattress 16.25
- Ostermoor mattress 25.00
- Coil Springs, No. 91 at 7.60
- Rex coil spring, full top lacing 9.00
- Cable spring 10.50
- Slumber King spring 12.00
- King couch and mattress complete 16.50
- Child's crib with mattress 13.75

MAN AND WOMAN

I can't figure out to save my life why some women just naturally always take everything personal. The other night Josephine and the boys were on each side of the lamp as peaceful like as you please and all of a sudden she bust right out loud laughing and she looked at me over the top of her finger with that "now I've got a good one on you" expression on her face and she read me this—

"Scientific investigation proves the ingredients of a man are—

"Pat enough for a bar of laundry soap.

"Iron enough for two nails.

"Sugar enough to fill a teacup.

"Line enough to whitewash a chicken coop.

"Phosphorus for a box of matches.

"Potassium enough to explode a toy pistol.

"Saltpetre enough to rid a dog of his fleas.

"But all this junk can be bought at any corner store for eighty-nine cents."

Well, whenever Josephine sees humor in a silly piece like that I don't agree with her. I just retired with dignity. Now I retired all right, but I couldn't sleep, and pretty soon the answer came to me as a natural inspiration, and I got up and told her exactly that I had at last analyzed the subject of woman as men had been trying to do ever since the world began.

"Woman," I said, "has been proved to contain—

"Starch enough to be all stuck up with herself.

"Bread enough to built in anywhere.

"Call enough to embitter the sweetest male disposition.

"Fatn enough for an Italian sun-die."

"Powder enough to blow up a dreadnought.

"Perfume enough to gas a regiment."

"All of which can be had in any department store for thirty-two cents."

The next mornin' I got my own breakfast. —Farmer Putnam.

FARM FOR SALE

Quarter section irrigated farm, one mile north of Lathoon, growing; fenced and cross fenced; 90 acres cultivated; 45 acres in Grinn alfalfa; 3 acres hog pasture fenced; irrigation system in good order; no wild cats or Canada thistle; good buildings; drilled well with plenty of good water. Will sell or rent. Will also sell 1 team horse; 1 purchased Berkshire sow; ten dairy cows to be fresh in the fall; 5 helters; different kinds of farm implements all in good working order.

A. Konkolevsky.

Local News

Rev. Mr. Barton, of Hussar, spent last Monday in Hussar.

They dinette afternoon tea and sale of home cooking on Saturday, Sept. 10.

W. E. Sambrone, resident of Lathoon, of the new 1928 model Chevrolet.

Stuart Marchand of Calgary, is visiting with some of his boy friends in Bassano.

Mrs. Lee returned home last Saturday after spending a holiday at Banff.

R. A. Travi, motored to Banff and brought back Mrs. Travis and children on Tuesday.

Mr. and Mrs. W. H. Palmer, of Chazy, were in town last Thursday evening for a visit with friends.

Mrs. H. D. Powers returned to her home in Calgary on Wednesday after visiting with Mrs. Wm. McLaws.

Dr. W. F. Keith is playing in the provincial amateur golf tournament in Calgary.

Rev. A. O. Thomson preached in St. John's Church, Medicine Hat, last Sunday.

Mrs. H. P. McDonald and children were visitors to Calgary for a few days this week.

Sgt. Robt. Wight is driving a new Chevrolet sedan, purchased from W. E. Sambrone.

Mrs. E. R. Culbertson will resume her teaching of piano pupils Monday, Sept. 10. New pupils received at any time.

Mr. and Mrs. Wm. Blankstein, spent the weekend at Jenner, the guests of Mr. and Mrs. M. J. Stapleton.

Alt Freeman, of Lathoon, has his crop of rye sold. The yield was a little more than thirty-three bushels to the acre.

Holy Communion service will be held in the Church of the Blessed Virgin next Sunday morning, Sept. 16, at 11 o'clock. Sunday school at 2 p.m.

E. C. Small was in on Monday from Gen. He expected to start cutting his barley which he expects to go about six bushels to the acre.

Mr. and Mrs. J. B. Donaldson and son Bobbie returned home Wednesday after spending two weeks vacation at Vancouver and Victoria.

Mr. and Mrs. J. S. Ogilvie, of Clivevale, were week-end visitors at the home of Mr. and Mrs. H. O. Bredin.

Mrs. Woodward and children moved to Duchess on Monday where Mr. Woodward is employed in the Parrell store.

R. J. Bell of Hussar and Mr. Lee of Chancellors, were in Bassano last Sunday to attend Masonic service in Knox Church.

Lonel Sandford, a former Bassano boy, has started a job printing business in a town in Georgia. He has signed his business the Sandford Press.

The family of D. Cathro, manager of the dry goods department of McKee's Store, have arrived in Bassano, and are now living in the apartments above the store.

Miss Violet Brunley will teach at Burn Brae school this coming term. Miss Brunley went out Wednesday to commence her new duties with the opening of the school term on Thursday, Sept. 1st.

Mr. and Mrs. Franzisco, of Buffalo, passed through Bassano on their return from a six weeks' trip through the national parks. They picked up some men here for their threshing crew, and expect to commence threshing operations at once.

Mr. and Mrs. White and Miss Frances White, of Providence, Rhode Island, left on Wednesday to continue their journey to the coast after visiting for the past few weeks with their daughter, Mrs. M. D. Macdonald. They will stop off for a while at Banff and Lake Louise.

L. E. Ormond, barrister of Calgary with whom Mel Millard, former Bassano lawyer is now connected, sustained a fractured skull when he fell down a flight of stairs at the Club Cafe in Calgary. Mr. Ormond's condition is serious.

W. R. Whitley who farms northwest of Hussar, was a business visitor to Bassano last Tuesday. Mr. Whitley's crop was completely hail-damaged early in July, but he says the second growth is coming along good if the grain does not get damaged by frost, he expects to thresh about 18 bushels of wheat to the acre, and his oat crop will yield more than 60 bushels to the acre.

THE ROLE OF THE SOIL MULCH IN MOISTURE CONSERVATION

(Experimental Farm Note)

...drying the surface of the soil after a rain to produce a mulch has not proved to be any more effective in conserving soil moisture than where the surface has been left untouched.

In the prairie provinces, where moisture conservation is very important, the statement sometimes appears that the soil should be mulched to prevent loss of water. This statement is based on the well known principle of the capillary movement of water through the soil to the surface where evaporation may be checked by a suitable mulch.

Capillary movement, however, depends upon the presence of some free water at a comparatively shallow depth. When this is more than two or three feet the upward movement is very slow. When it is from eight to ten feet there is practically no movement. On the prairies there are few places where water can be located as near the surface as two or three feet, usually the higher limits are reached many times before water can be found. The mulch, therefore, cannot prevent a movement that does not exist and yet, under certain conditions a mulch may materially aid in conserving soil moisture.

Investigations have shown that changes in the moisture content of the soil may be caused by the movement of water as vapour and that this movement is effected by variations in temperature. On a dry, hot day considerable amounts of soil moisture may pass up through the soil as vapour and be lost. A covering of any material such as straw, leaves or sawdust, which do not conduct heat readily, will keep down the soil temperature and so lessen the loss by evaporation. It is of course out of the question to cover any considerable area of land with some heat resisting material. The water stored in the soil near the surface, in land which is fallow, will be lost by evaporation depending on the degree of temperature and dryness of the weather, aside from any treatment which the soil surface may have received. As soon as a depth is reached where temperature fluctuations are light, the loss of moisture as vapour becomes very small.

Where the land is free from weeds surface cultivation after a rain will not materially aid in conserving the moisture stored near the surface. Cultivation is of course necessary on soil which cracks badly on drying in order to prevent excessive drying through the circulation of air. The most serious loss of soil moisture is brought about by the growth of weeds and cultivation is absolutely necessary to check this loss.

Just Like That

Dressmaker—"Your dress will be done just as soon as I sew the fastener."

Flapper—"All right; make it snappy."

Cold Feet

Everything was in readiness for the marriage ceremony, and both groom and best man had arrived at the church in plenty of time. The former, however, was uneasy.

"What's worryin' 'em, Tamsen?" asked the best man, tipping up the bride. "He's goin' to lose the ring."

The other gazed at his friend's immaculate attire and general air of gay bachelordom. Then he heaved a woful sigh.

"No," he answered rather deponently; "the ring's safe enough, man, but I've lost me old enthusiasm."

When Candor Rules

"It often happens," says a doctor, "that a man who is a lunatic is entirely ignorant of the fact." Unless he happens to be married, of course.

Watchful Waiting

The lecturer warned to his task. "The consequences of drunkenness are terrible. If I had my way I would throw every cask of beer, every bottle of wine, every keg of brandy into the middle of the sea."

Voices from the Audience—"Bravo! Bravo!"

Lecturer (very pleased)—"You are also a confirmed teetotaler, my friend!"

Voices from the Audience—"No, I'm a deep-sea diver."

At the intersection of two busy streets where traffic is sometimes dangerous, a newly arrived Frenchman was knocked down by a passing auto. Courteously and efficiently the traffic policeman picked the Frenchman up, brushed off his clothes and passed him his hat. Some or less bewildered but profoundly grateful, the Frenchman exclaimed: "Parlez vous Français?" so which the policeman replied: "No, Chevrolet coupe."

PORD SOLVES PROBLEMS OF NEW MODEL CAR

PORD, Ontario.—"All the problems concerning design and manufacture of the new Ford car have been solved," declared W. H. Campbell, vice president and chairman of the Ford Motor Co. of Canada, Ltd., in a recent interview.

"The design of the new car has been carefully tested," said Mr. Campbell, "and we are now completely satisfied with it. The design of the tools and machines for its production also have been completed. Many of these tools and machines are now ready for use."

Questions asked Mr. Campbell about specifications of the new car elicited little information. He did, however, give the interviewer the first data that has been available from a company official. Mr. Campbell said that the new car had been driven at a speed of 65 miles per hour, and that recently it maintained a speed of fifty-five miles over a period of several hours.

WORLD HAPPENINGS
BRIEFLY TOLD

Carroll Adams, Jr., of the Hart House Theatre, University of Toronto.

The date of the conference of the President's Ministers, with the Federal Government has been set, for November 2, and will probably be held in Ottawa.

Four special stamps have been issued in Japan, to commemorate the British anniversary of the entry of that country into the United Nations.

Total profits made through liquor hauled by the British Columbia Motor Control Board reached \$132,872 for the six months period ending March 31, it is announced.

The death of Zogol Tash, President of the Egyptian Chamber of Deputies and Nationalist leader, is announced in a Cairo telegram to the Egyptian Telegraph Agency.

At a meeting of the Canadian Aeronautical Association held in Toronto, the recent state of aviation in Canada and plans for placing the country in a forward position in this respect were the feature topics of discussion.

Future long distance flights should have far better propagation and more stringent regulations than the Dole air race to Hawaii, according to U.S. Department of Commerce aviation officials.

Proposals for the establishment of two grain elevators and a flour mill at Victoria by a Buffalo-Yukon syndicate, were considered recently at a special meeting of the city council. The combined cost would run to nearly \$2,000,000.

The erection of a mooring mast in the vicinity of Montreal to accommodate the transatlantic service, followed by providing similar facilities on the Pacific coast, according to a prominent government official, in touch with plans for controlling the far-flung portions of the Empire by airship routes.

Why Churchill is Favored

Many Advantages Offered by Northern Port Cause Rights to be

Points in favor of Port Churchill as the terminus of the Hudson's Bay Railway, are outlined by General Paterson, president of the Churchill Harbour Association, as follows:

Twenty-four hours unhampered access.

Absolute protection from wind and waves.

Available for ships of any draft.

Great saving in cost of construction.

Can be completed many years sooner than Nelson.

No light ships or buoys required as entrance is direct from deep water into harbor.

Innavigable reefs should be less.

There should be a very great saving in ships' time which is most important when a short season is taken into consideration.

Harbor is large enough to handle considerably more shipping than now.

There are some of the advantages of the only disadvantage is the maintenance and operation of ninety additional miles of railway.

"It seems to be the case that the shore ice is clear at Churchill as often as at Nelson, owing to the westerly current on the west side of the Bay, and there would be no advantage in keeping the harbor open with ice breakers as long as may be desired.

There are some of the advantages of the only disadvantage is the maintenance and operation of ninety additional miles of railway.

"The two-toned schooner 'Mary Blanche' recently arrived at Port Clarence, Rhede Island, from Providence Cape Verde Islands, having made the voyage of 3,400 miles in forty days.

The remarkable feature of the voyage, however, was not the time consumed but the fact that during the entire passage all her hulls were wet and not once was one lowered or reefed.

The veteran mariners of Providence port say that such a record was never before made and that the voyage is unique in the annals of transatlantic navigation.

"The hardest way is best."

"The hardest way is best," says Thomas A. Edison, "but he goes on to declare that 'whoever he believes in' must not only be able to keep his feet on the ground but also to be able to keep his feet on the ground."

Largest Indian Rock
Carving Discovered

Petroglyph on Caribou Highway. More Than 200 Feet Long

The largest petroglyph in Canada has just been reported to the archaeological office of the National Museum of Canada at Ottawa.

This petroglyph is said to be more than 200 feet long and to be carved on a vertical face of redish rock of the plateau, situated on the side of the Fraser River valley, about half a mile south of the eastern end of the Alexander bridge, on the Caribou Highway. A foot-high trail runs up its direction, from which it probably can be seen. The photo is only about 12 miles from Yule on the railway line and being both the largest and the most easily accessible of the petroglyphs, it may be set aside as a national monument because of its value as a tourist attraction.

Precisely to the discovery of the largest known petroglyph in Canada was on the west side of a 70-foot canyon about one mile south of the Mackenzie highway, at a point some four miles from the sea in the "Norway of Canada" near Bella Coola.

Future long distance flights should have far better propagation and more stringent regulations than the Dole air race to Hawaii, according to U.S. Department of Commerce aviation officials.

Proposals for the establishment of two grain elevators and a flour mill at Victoria by a Buffalo-Yukon syndicate, were considered recently at a special meeting of the city council. The combined cost would run to nearly \$2,000,000.

The erection of a mooring mast in the vicinity of Montreal to accommodate the transatlantic service, followed by providing similar facilities on the Pacific coast, according to a prominent government official, in touch with plans for controlling the far-flung portions of the Empire by airship routes.

DISTINGUISHED VISITORS TO CANADA

Canada is an ideal holiday resort in the opinion of the distinguished group of managers who arrived in the Dominion a few days ago on the White Star liner Megantic to enjoy their vacation. From left to right the group includes Sir Thomas Edmonstone, Bart., Senator in the Irish Free State, and Lady Edmonstone; Lady Craig, her daughter, and Sir Ernest Craig, Bart., M.P. for Crew, who owns collieries in Wales. Sir Thomas Edmonstone is a

hunter of note and despite the fact that he has hunted in practically every country he thinks Canada has the finest hunting and fishing in the world and he has said so in one of his books. On this trip he will travel through Canada and probably shoot big game in western Canada. Sir Ernest Craig, on the other hand, will enjoy a quiet holiday in the Muskoka Lakes district before returning to England on one of the White Star liners.

At 145,200,000 Volcanic Peak On Western Aleutian Islands Is On Rampage

Bozofash Island, a volcanic peak in the Western Aleutian Islands which rose from the sea May 18, 1936, is intensely active again, according to a report from Seattle received upon its return from Siberia as a trading vessel.

"We went within three miles of the island," Flann said. "The entire island seems alive, smoke and steam was issuing from every part and many huge cracks could be seen. It has the appearance of an Inferno. Hundreds of sea lions were being driven off the island roaring as if in protest of the burning of their island home."

Russia's Millions Population of Soviet Union Estimated

The total population of the Soviet Union in round numbers is 146,500,000 says a report submitted to the Council of People's Commissaries by the Central Statistical Department.

Russia proper (The R.S.F.S.R.) contains 109,200,000 people, Ukraine 24,800,000, White Russia 4,800,000, Caucasus 5,800,000, Uzbekistan 5,100,000, and Turkistan 1,400,000.

Was Well Equipped

The vicar of a small village said to a youth of his flock, "I'm afraid, William, you're tampering with the affections of several girls in this parish. I'm told that you're courting a girl in this village, another at Crompton, and a third at Modbury."

"Well, sir," said William happily, "I've got a motor-bike."

Some women are not as fresh as they are painted; and some are more so.

"I look forward every Sunday to the light of a candle, will general."

"I thought you never slept after dinner."

"I don't, but my wife does."

Wallace of the White Farm, over the
week-end.

OBITUARY

JOHN JAMES RADFORD

The death occurred in Bassano on
Tuesday, August 30th, of John James
Radford, at the age of 78 years. Mr.
Radford had been a resident of the
Bassano district for the past six-
ty years. He came from Perth,
Ontario. The funeral was held from
Knox Church on Thursday, Sept. 1st,
and the remains were deposited in
the Bassano cemetery. Two of the
family of the deceased are resident
in the Bassano district: Bob Radford,
of Glen, and Mrs. H. Grayson, of
Bassano.

Ladies' fall and winter hats at
Jack Torgan's; \$2.50 to \$4.75.

WEDDING

BLOOM—RODDIERNE

A very quiet wedding took place in
the Church of the Redeemer, Los
Angeles, California, on July 20th,
when Charlotte Elizabeth Roddierne
eldest daughter of Mr. and Mrs. Chas.
Roddierne at Crowfoot, Alberta, be-
came the bride of Mr. Walter Bloom,
second son of Mr. and Mrs. B. Bloom
of 729 South Bernal Avenue, Los An-
geles, California. The Rev. Frank-
lin U. Hughes officiating. Only a
few relatives and intimate friends
attended.

The bride looked charming in a
pretty blue chiffon tulle dress with
hat to match. Miss Dolly Bloom,
sister of the groom, attended her
and looked very dainty in yellow geor-
gette dress with hat to match. Mr.
Lyle Levi supported the groom.

After the service a dainty supper
was served by the groom's mother,
Mrs. R. Bloom. After eating the cake
the happy couple left for Catalina
Islands where the honeymoon will be
spent, and on their return Mr. and
Mrs. Walter Bloom will make their
home in Los Angeles.
They were the recipients of many
useful presents.
The bride's going away dress was a
fawn silk apron suit trimmed with
blue with hat to match.

School shoes and stockings for
the kiddies at moderate prices; Jack
Torgan.

Oil Industry Growing

CALGARY—Oil wells in Turner
Valley are producing various grades
of crude oil and naphtha at the rate
of about 4,500 barrels per month,
according to a survey made by the
Calgary Herald. This figure is of
crude naphtha of the type pro-
duced up of 34,100 barrels per month
dredged by Royalite No. 1 and 17,000
barrels of crude oil of the type pro-
duced by McDougall-Sagar No. 1.
McLeod No. 1 and 3, and the Home No.
1 well.

HAUL BIG CROP
C.P.R. PREPARE TO

WINNIPEG—With the thousands
of grain cars already on its lines in
the west augmented by 10,000 addi-
tional from eastern lines, and with
70 of the largest engines in the
country transferred to the prairie
to reinforce the hundreds already in
service, the Canadian Pacific Railway
is all ready to help move the wheat
from the country elevators to the
markets of the world. Thousands
of box cars are distributed at strategic
points; grain doors provided,
and arrangements completed for the
necessary extra personnel. Every
unit is in first class condition, and
ready for immediate service.
